

IBS GULF DESIGN PVT LTD.

## **ENVIRONMENT AND SUSTAINABILITY POLICY**

IBS Gulf Design Pvt Ltd believes that the present generation should act responsibly towards our environment so as to ensure that our future generations inherit this planet in an environmentally better condition than it is now. IBS Gulf Design Pvt Ltd will play its part towards achieving this goal by strictly adhering to the following:

### **IN OPERATIONS**

- ✓ Minimise use of energy by encouraging staff to use daylight to the extent possible and switching 'Off' all appliances when they are not required.
- ✓ Discourage staff from using air-conditioners in office at all times and encouraging them to use natural ventilation to the extent possible.
- ✓ Educate staff in optimal use of all resources such as water, power and consumables.
- ✓ Encourage staff, client and vendors to transmit information electronically to the extent possible thus avoiding use of paper.
- ✓ Print only those documents/drawings which are required statutorily or totally unavoidable. Even in these cases printing on both sides of paper to the extent possible is encouraged.
- ✓ Discourage travel unless it is absolutely essential. Encourage alternates such as Conference Calls, Video Conferencing etc.,
- ✓ Educate and staff on environment and sustainability.
- ✓ Dispose all waste generated in appropriate manner.
- ✓ Adhere to all statutory laws and regulations pertaining to environment.

### **IN CONSULTANCY AND DESIGN SERVICES**

- ✓ Provide regular training to employees and facilitate attending relevant seminars to ensure they are knowledgeable in the latest trends in technology, energy & resource optimisation.
- ✓ Educate and create awareness in Clients and other Stakeholders on the benefits of using 'Green' technologies in their projects.
- ✓ Design Projects giving utmost preference to use of Environment friendly products and practices that fit into the Client's budget.
- ✓ Specify products and materials that employ environment friendly methods in their production, provide better energy and resource savings.
- ✓ Specify independent Testing and Commissioning agents for witnessing the testing of various services in a project to ensure that works are executed as per design intent and precious energy & resources are not wasted.
- ✓ Educate Client's Facility Management team in proper usage of equipment and optimisation of various set points which would result in reduced energy consumption and lower usage of resources.
